

Mark:

Start the engine that can cut costs and boost the performance of all your workload automation.

Look inside to learn how to schedule a meeting and get the remote control for your new Ferrari!

Mark:
Supercharge your scheduling and batch processing. The keys are inside.

Look inside to learn how to schedule a meeting and get the remote control for your new Ferrari!

Take the wheel of BMC Control-M and manage critical workload processes faster, more efficiently, and more reliably.

Take the wheel of your cool new Ferrari!

This cool remote controlled model is anything but a toy. It's a dream car with precise steering, brakes, headlights that shine, and turn signals. Once you take control of this speed machine, you'll never want to let it go.

Business processes too important to ignore.

We don't have to tell you how vital scheduling and batch processing are to your business. We would like to remind you, though, that lack of standardization, automation, and integration can lead to costly inefficiencies, outages, and other incidents that can negatively impact your organization. Control-M keeps that from happening.

Save time, save money, reduce risk.

Control-M is a faster, more cost-efficient way to manage workload. It reduces the number of failure points and delays caused by manual processes. It eliminates reliance on multiple toolsets and staff resources. It can reduce your software footprint and deployment by as much as 80%.

All we ask is the opportunity to tell you more about Control-M. When we do, we'll provide you the remote control for your cool Ferrari.

The benefits of Control-M are turning heads and trimming costs worldwide.

Gartner, Inc., one of the world's leading IT research and advisory companies, has positioned BMC Control-M in the Leaders Quadrant of the 2009 Job Scheduling Magic Quadrant.

More than 2,000 organizations have installed Control-M, the vast majority replacing other schedulers.

After installing Control-M, a major computer manufacturer increased scheduling capacity from 12,000 jobs monthly to 85,000 jobs monthly, with a fraction of their previous staff and overhead.

A transportation manufacturer's mega move.

A well-known company in the transportation manufacturing business installed Control-M and was able to manage 500,000 more jobs per month without adding staff, for a 500% increase in job processing.

Your BMC representative, Andrew, will be in touch after you receive this package to schedule a conversation with you about Control-M. After that conversation, the remote control for your Ferrari will be provided to you.
